

# APPLICATION ACTIVITY 1.1

## ***1. By using simple words, define computer security?***

Computer security means protecting computers, networks, and data from damage, theft, or misuse. It helps keep information safe and private.

## ***2. In pairs, discuss and write a brief report on importance of computer security at your school, in Rwanda and in the whole world.***

Computer security is important because it protects students' and teachers' data at school, ensures safe online learning, prevents hacking in Rwanda's systems like banks and government, and keeps the world safe from cybercrime.

## ***3. Write down some cases of computer security break that have happened in Rwanda and in the world.***

Examples of computer security breaks: - Rwanda: Cases of mobile money fraud and hacking attempts on institutions. - World: Cyber attacks like WannaCry ransomware, Facebook data breach, and attacks on banks.
